Agenda

01

Why we exist

Mission, seed capital and what success looks like

02

Who we are

Governance structure, leadership and sector teams

03

What we invest in

Asset allocation, permitted securities and ESG

04

How we manage risk

Position limits, sector ranges and drawdown triggers

05

How we decide

From investment report to executed trade, and beyond

06

How we conduct ourselves

Personal trading, MNPI, accountability and next steps

Australia's only MBA student-managed fund

A live portfolio of real capital, run by MBA students on behalf of Melbourne Business School: bridging classroom finance and professional practice, and building a lasting institutional asset across cohorts.

$100K

Seed capital approved by the MBS Finance Committee

4

Markets: ASX 300, S&P 500, developed and emerging

7

Coverage sectors, each run by a sector team

12–16

Direct stocks in a high-conviction portfolio

Assets are owned by MBS and held in an MBS-owned, CHESS-sponsored account with CMC Markets. The Fund manages the capital on the School's behalf, and capital will be fully deployed by the end of 2026.

What success looks like

Return

Beat the composite benchmark by 1.0% p.a. after fees over rolling 3-year periods.

Secondary: CPI + 3.0% p.a. over rolling 5-year periods, so capital grows in real terms.

Educational

Direct experience in equity research, portfolio construction, risk management and investment committee governance.

A verified, auditable track record members can reference professionally.

Legacy

Grow the Fund into a lasting institutional asset.

Surplus returns can, in time, fund scholarships and initiatives for the MBS student community.

Priority rule: capital preservation and IPS compliance come before outperformance. No leverage, ever. A 15% fall from peak triggers a formal review even if we are ahead of the benchmark.

How the Fund is governed

MBS Institutional Oversight
Dean · Faculty Director — mandate and IPS oversight only

Advisory Board
Industry experts & alumni · non-voting

EXECUTIVE COMMITTEE — governance decisions by majority vote, one vote per person

Leadership Committee

President · Vice President

Sets strategy and governance; MBS and stakeholder liaison

Investment Committee

CIO · two Co-Heads of Research

The only voting body on trades: ≥2 of 3 votes

Risk & Compliance

Chief Risk Officer

Independent IPS, limits and ESG check before every vote

Operations & Relations

Secretary

Agendas, minutes, registers, archive and elections

Vetoes: the President (process or IPS grounds) and the Faculty Director (IPS breach). Neither extends to investment merits.

Sector Heads & Sector Analysts (non-voting)

Risk & Compliance Officers

Relationships Team (reports to VP)

Our leadership and support teams

EXECUTIVE COMMITTEE

TS — **Tanishq Singh**
President & Chief Investment Officer

RG — **Syed Raffay Gilani**
Vice President

AL — **Amad Lone**
Co-Head of Research

SR — **Scott Russell**
Co-Head of Research

GM — **Giuseppe Mottillo**
Chief Risk Officer

JZ — **Joanie Zhang**
Secretary

MBS Oversight

Dr Jenny George — Dean
Dr Leon Zolotoy — Faculty Director

Risk & Compliance Officers

Joel George
Devan Ruben
Ritvik Gupta

Relationships Team

Mehr Mehndiratta
Aidan Filippis
Sherly Wong
Mady Amarasinghe

Seven sector teams

Financials

Research lead: Scott

Vibhas Kamal
Toby Moran

Industrials & Materials

Research lead: Amad

Muath Alzahrani
Alroy Remedios
Nikhil Chaudhry

Utilities & Energy

Research lead: Amad

Ashley Uhm
Alejandro Hidalgo Gonzalez

TMT

Research lead: Scott

Uttakarsh Tikku
KyShen Tang
Rane Arthur

Real Estate & Infrastructure

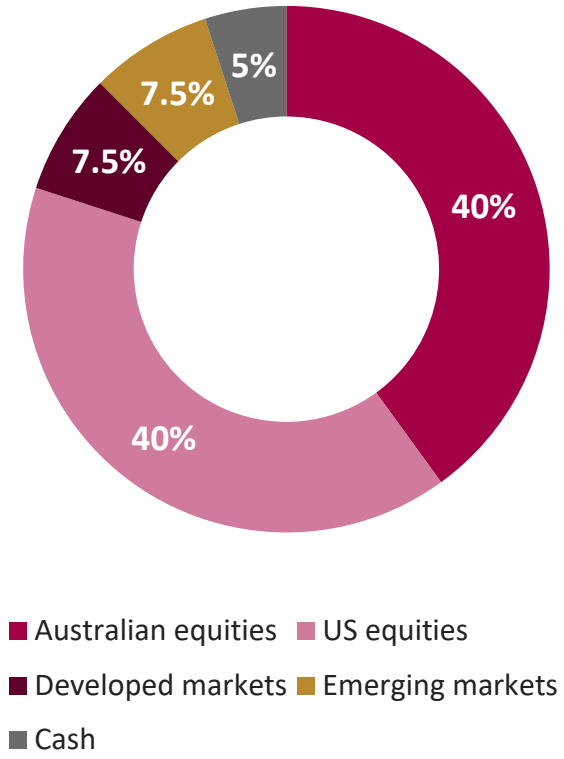

Research lead: Amad

Geoffrey Page
Kosuke Hashimoto
Manas Meher

How sector teams work

The Sector Head is the single point of contact. The team writes investment reports together, pitches to the IC and owns each holding until it is sold.

Strategic asset allocation: 95% equities, 5% cash

Asset class	Target	Range	Implementation
Australian equities	40%	20%–60%	Direct S&P/ASX 300 stocks, plus ASX-listed ETFs
US equities	40%	20%–60%	Direct US-listed stocks, plus US equity ETFs (US- or ASX-listed)
Developed markets	7.5%	2.5%–12.5%	ASX-listed developed markets ETFs
Emerging markets	7.5%	2.5%–12.5%	ASX-listed emerging markets ETFs
Cash	5%	3%–7%	Brokerage cash account

Rebalancing and tilts

- Equities split 40/40 AU/US, plus 7.5% each in developed and emerging markets; tilts of ±20 pp on AU and US, ±5 pp on the others
- Reviewed at every quarterly performance meeting; out-of-range classes fixed within 60 trading days
- New cash and dividends used first, to limit brokerage and CGT events
- President proposes model portfolio shifts; tilts need an Executive Committee vote

What we can and can't buy

Liquid, exchange-traded, unleveraged securities only. Anything not listed as permitted is prohibited.

Permitted

- Ordinary shares in the S&P/ASX 300
- US-listed shares and US equity ETFs
- ASX-listed ETFs tracking equity or cash indices (incl. emerging and developed market ETFs)
- REITs and listed infrastructure within the ASX 300
- Cash in the brokerage account

Prohibited

- Margin lending, borrowing or any leverage
- Short selling
- Derivatives: options, futures, warrants, CFDs, structured products
- Leveraged, inverse or synthetic ETFs
- Cryptocurrencies and crypto ETFs
- IPOs, placements and unlisted securities

ESG: screened before every vote

Risk & Compliance screens every proposed holding before it goes to a vote. Exclusions apply to direct stocks, and to ETFs where excluded companies exceed 5% by weight.

Controversial weapons

Cluster munitions, landmines, chemical, biological and nuclear

Tobacco

Tobacco manufacturers

Thermal coal

Miners, and generators with >25% revenue from thermal coal

UN Global Compact

Companies in serious breach of its principles

Gambling

Operators with >25% revenue from gambling

Integration: every investment report has an ESG section covering material risks, controversies and the Morningstar Sustainalytics risk rating. "Severe"-rated holdings must be flagged in the pitch. Prefer ESG-screened ETFs where cost and tracking are comparable.

Position and concentration limits

10% / 20%

Single stock

Max at purchase / hard ceiling (same for any broad-market ETF)

70% / 85%

Top 10 direct holdings

Combined, at purchase / hard ceiling (excludes ETFs)

12–16

Direct stocks

Concentrated, high-conviction portfolio

$1,500

Minimum position

Avoids immaterial holdings and excess costs

±20 pp

Sector deviation

Max vs each sector's benchmark weight

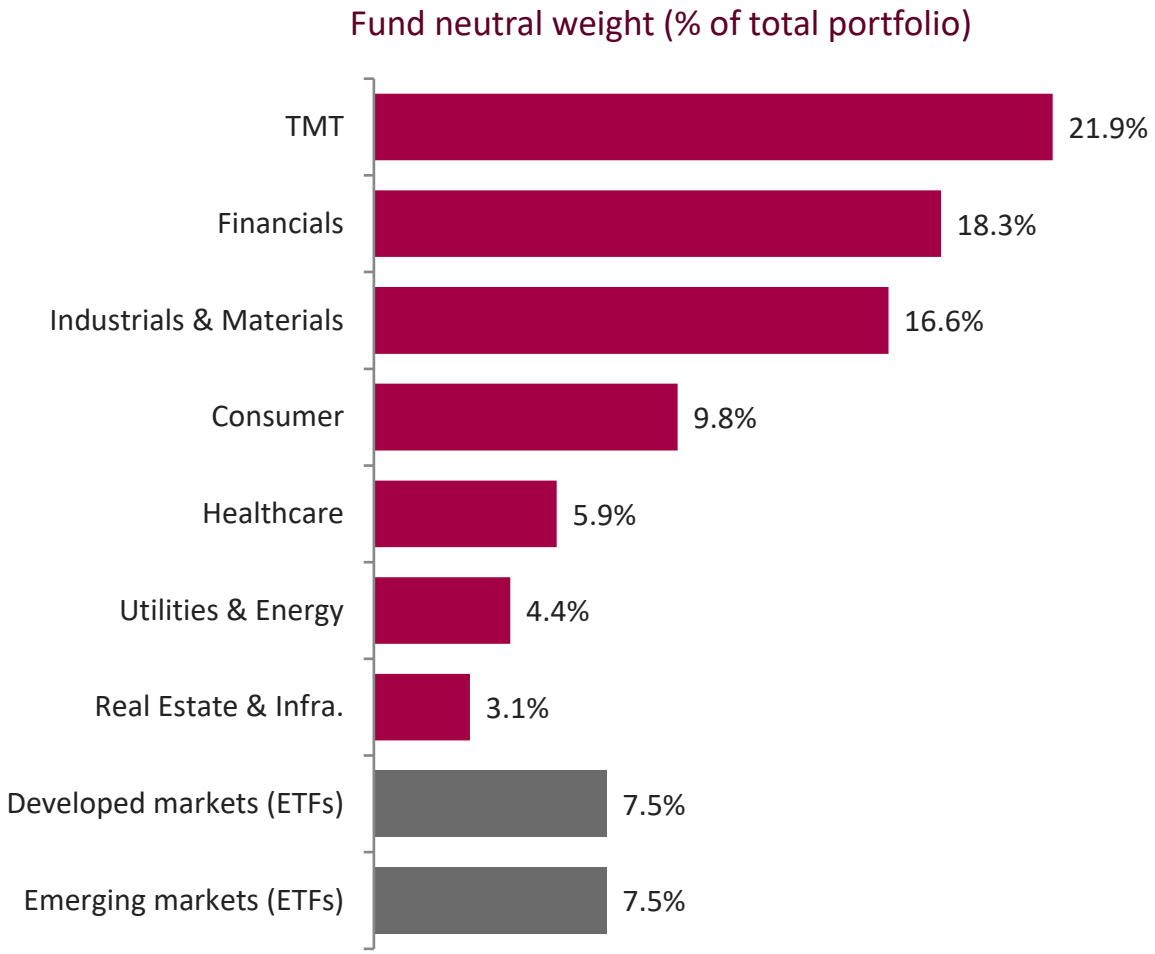

20 days

To trim a breach

Trading days to fix a passive ceiling breach

Limits are measured at market value.

Sector neutral weights are reference points, not targets

How to read this

- Neutral = 40% × ASX 300 sector weight + 40% × S&P 500 sector weight. Developed and emerging markets ETFs (7.5% each) sit outside the sector split, for 95% equities in total.
- Overweight or underweight on conviction, within ±20 pp of each market's benchmark sector weight.
- With 12–16 stocks we won't hold every sector directly; broad ETFs can fill gaps.
- ESG exclusions may mean structural underweights in Utilities & Energy, Industrials & Materials and Consumer.

Benchmark weights at 31 Jul 2026 (ASX 300) and 12 Oct 2026 (S&P 500); R&C updates them quarterly.

Risk tolerance and escalation triggers

Above-average risk tolerance: a perpetual horizon and no required withdrawals let us accept volatility and concentration, moderated because this is MBS's capital and members rotate each cohort.

–25%

Single stock from cost

Quick thesis update at the next meeting. Not an automatic sell.

–15%

Portfolio from peak

Formal review by the Executive Committee; Faculty Director informed.

–25%

Portfolio from peak

Executive Committee agrees a risk-reduction plan and shares it with the Faculty Director.

Escalating severity

Tracking error: Guide ≤ 6% p.a. vs benchmark (no hard limit); discussed at the next Executive Committee meeting

Portfolio volatility: ≤ 1.2× benchmark volatility (12-month rolling); R&C reports to the Executive Committee

How we're measured and how we report

Composite benchmark (rebalanced monthly)

Component	Weight	Index
Australian equities	40%	S&P/ASX 300 Accumulation Index
US equities	40%	S&P 500 Net TR (AUD, unhedged)
Developed markets	7.5%	MSCI EAFE Net (AUD, unhedged)
Emerging markets	7.5%	MSCI EM Net (AUD, unhedged)
Cash	5%	Bloomberg AusBond Bank Bill Index

- Time-weighted returns, after brokerage and FX costs
- Nothing annualised for periods under 12 months
- Each sector compared against a sector ETF chosen by R&C
- Risk metrics: volatility, tracking error, max drawdown

Reporting rhythm

Monthly	Transaction records & holdings → MBS, Faculty Director Owner: CIO
Quarterly	Compliance & limit check → Executive Committee Owner: Risk & Compliance
Quarterly	Performance, holdings, ESG → MBS, Advisory Board, members Owner: Relationships Team
Annually	Annual report & IPS compliance attestation → Dean, Faculty Director Owner: President
Each meeting	Minutes and vote records Owner: Secretary

Public posts may show performance and top holdings, never pending trades or research under review.

From idea to executed trade

1

Write

Sector team writes the investment report; Sector Head submits it

2

Review

A Co-Head of Research reviews and approves

3

Check

CRO confirms IPS hard limits and ESG exclusions

4

Vote

Investment Committee votes: ≥2 of 3 in favour

5

Minute

Secretary minutes decision and vote before execution

6

Execute

CIO places limit orders on CMC; R&C records the trade

The investment report

Thesis, valuation, key risks, ESG and exit triggers. A few pages is enough. Kept on file so later cohorts can follow the decision.

Quorum: 2 voting members. A tie from absence or recusal means no trade. Approvals last 20 trading days.

No report, pitch or vote needed for

- Rebalancing back within IPS limits
- Cash management and dividend reinvestment
- CIO top-ups or trims of existing holdings: max 2% of the portfolio, once per holding per quarter, within at-purchase limits

Owning a holding: coverage, reviews and exits

Every holding is owned by its sector team, who keep the thesis and exit criteria current until the position is sold.

Results update

15 trading days

Update the report and exit criteria after each results announcement; a Co-Head reviews and flags concerns.

Annual review

Once a year

Each holding is presented to the IC, which votes to keep, trim or sell.

Triggered review

20 trading days

Breach of a limit or an exit criterion: updated report, then a vote. Keeping needs 2 votes, otherwise sell within 20 more days. No top-ups while in review.

Selling

Short exit note

Outside a review, a short note (why, and what we learned) plus an IC vote with 2 in favour.

Direct US stocks follow the same process. The report should also note currency exposure and any FX, custody or withholding-tax costs. US only, where CMC charges no brokerage.

Personal trading, MNPI and conflicts

Personal trading

- Never trade ahead of the Fund
- No personal trades in any security under research, pitched or pending execution
- Blackout: pitch submission until 3 trading days after the Fund's trade or a rejected vote

Material non-public information

- Research uses public information only
- Received MNPI? Tell the President in writing (or the Faculty Director) and recuse
- The company goes on a restricted list until the information is public

Conflicts of interest

- Disclose holdings in anything you pitch, vote on or research: in writing before, verbally at the pitch
- Recuse from all related research, discussion, pitch and vote
- Non-disclosure is grounds for immediate removal

Accountability framework

Unsatisfactory progress: repeatedly missing pitch, research or compliance deadlines; unexcused absences from consecutive mandatory meetings; or breaching professional, confidentiality or conflict standards.

1

Written notice

Executive Committee sets out the issues and offers support

2

14 days

To remedy the issues in the notice

3

Probation

Written deliverables, due within 21 days

4

Removal vote

Majority of the Executive Committee; role declared vacant

Immediate removal: serious misconduct

Breaching confidentiality, trading on or sharing MNPI, unauthorised trades, concealing trade errors, undisclosed conflicts, dishonesty or harassment. The President may suspend at once; removal needs a two-thirds Executive Committee vote within 7 days.

Right of reply and appeal

5 days to respond in writing (3 for serious misconduct). Appeal to the Faculty Director within 7 days; their decision is final. No rejoining for 12 months.

Our research toolkit

CMC Markets	Trading platform, plus Morningstar research with our account. Execution restricted to the CIO and backup.
Koyfin	Screening, financials, consensus estimates and macro monitoring.
Quartr	Earnings calls, management presentations and investor-day transcripts across 65+ markets.

Supplementary: Market Index / Stock Analysis, ASX announcements and SEC filings, TradingView, Macrotrends, ETF issuer disclosures, RBA and ABS data.

Not permitted for Fund decisions

University library databases are licensed for academic use only:

- Factiva
- IBISWorld
- MarketLine
- Fitch
- The academic Morningstar licence

Morningstar via CMC Markets is fine.

Getting started

1	**Everyone**	Read the IPS and governance document; disclose any personal holdings and SRC roles to the President
2	**Sector teams**	Build sector watchlists and start on first investment reports
3	**Investment Committee**	Begin fortnightly meetings to review pitches and vote on trades
4	**Risk & Compliance**	Set up the breach register and record benchmark sector weights
5	**Secretary**	Stand up the conflict-of-interest register and the Research & Trade Archive

Key dates

End of 2026

50% Capital deployed

Term 1 each year

Annual IPS review; elections for vacant roles

Term 3 each year

Elections for vacant roles

3-year track record

Earliest distributions to MBS (if above inflation-adjusted seed)
